

**FILED**

DEC 23 2003

CLERK, U.S. DISTRICT COURT  
EASTERN DISTRICT OF CALIFORNIA  
BY DEPUTY CLERK

IN THE UNITED STATES DISTRICT COURT  
FOR THE EASTERN DISTRICT OF CALIFORNIA

JAMES CLAYWORTH, R.Ph., doing  
business under the fictitious  
name and style of Clayworth  
Healthcare Pharmacy; WAYNE  
ROBERTS, and MADELEINE MADDEN,  
Plaintiffs,

v.

DIANA M. BONTA, Director of the  
Department of Health Services,  
State of California, and  
DEPARTMENT OF HEALTH SERVICES,  
a department of the State of  
California,  
Defendants.

CALIFORNIA MEDICAL ASSOCIATION,  
et al.,  
Plaintiffs,

v.

DIANA M. BONTA, Director of the  
Department of Health Services,  
State of California,  
Defendant.

CIV-S-03-2110 DFL/PAN  
CIV-S-03-2336 DFL/PAN

MEMORANDUM OF OPINION AND  
ORDER

1 Medi-Cal providers and beneficiaries challenge the State of  
2 California's impending 5% reduction in the reimbursement rate  
3 paid to providers. Plaintiffs contend that the rate reduction  
4 violates the Medicaid statute, particularly the quality of care  
5 and equal access provisions, and they seek a preliminary  
6 injunction preventing defendant Diana Bonta, the Director of the  
7 California Department of Health Services, from implementing the  
8 rate reduction when it is scheduled to go into effect on January  
9 1, 2004.

10 The case presents two sorts of issues. First, the court  
11 must decide whether plaintiffs have standing and whether Congress  
12 has given them a cause of action under 42 U.S.C. § 1983 to  
13 enforce certain provisions of the Medicaid statute. The court  
14 concludes that Medi-Cal beneficiaries have both standing and a  
15 cause of action and that Medi-Cal providers have third party  
16 standing to assert claims on behalf of beneficiaries concerning  
17 fee-for-service rates. However, the court does not find that  
18 either beneficiaries or providers have a claim under § 1983 to  
19 enforce the provisions in the Medicaid statute relating to  
20 managed care plans. Those statutory provisions are addressed to  
21 the Secretary of Health and Human Services, are designed to  
22 reduce the State's costs, and do not unequivocally confer rights  
23 on either providers or beneficiaries. Furthermore, because  
24 managed care providers are contractually bound to provide  
25 adequate services to Medi-Cal beneficiaries, beneficiaries in  
26 managed care plans should not be adversely affected by the rate

1 cut. As will be explained, there are other avenues available to  
2 managed care providers to protest the rate cut.

3 Second, the court must decide whether the across-the-board  
4 5% rate cut, which was enacted by the California legislature,  
5 violates the quality and equal access requirements of the  
6 Medicaid Act. Under binding Ninth Circuit law, the Medicaid  
7 statute grants a right to beneficiaries to a rate setting  
8 decision by the State that is not arbitrary and that takes into  
9 account provider costs, quality of service, and equal access to  
10 medical services for Medi-Cal recipients. See Orthopaedic Hosp.  
11 v. Belshe, 103 F.3d 1491, 1500 (9th Cir. 1997). Where the  
12 administrative record reveals a considered decision by the  
13 Department of Health Services that a certain rate is consistent  
14 with the requirements of the Medicaid Act and the approved State  
15 plan, the court will review that decision with deference. Given  
16 the complexity of the Medi-Cal system, deference to the expertise  
17 of the Department of Health Services is not only appropriate, it  
18 is virtually a necessity. However, in this case, there is no  
19 record of considered decisionmaking. There is no evidence that  
20 the Director recommended the rate reduction, that the State  
21 legislature ever sought the recommendation of the Director, or  
22 that any responsible official in State government made a  
23 determination that the pending rate reduction is consistent with  
24 quality care and equal access in light of provider costs. Thus,  
25 as to this rate reduction, there is no considered decisionmaking  
26 process that the court may review. The decision to cut fee-for-

1 service rates across the board without analyzing the effect on  
2 services to beneficiaries is arbitrary and violates federal law.  
3 Accordingly, the court finds that the preliminary injunction  
4 should issue as to the non-managed care, fee-for-service  
5 reimbursement rates affected by the pending 5% rate reduction.

6       There are undoubtedly many ways in which the Director may  
7 reduce overall Medi-Cal costs. For example, some of the medical  
8 services provided by Medi-Cal are optional in the sense that they  
9 are not required by the Medicaid statute. A decision to cut  
10 these services from Medi-Cal would not implicate federal law even  
11 though the decision could leave some beneficiaries without  
12 coverage for medical care that few would consider "optional" in  
13 the normal sense of the term. But when the decision involves a  
14 cut to a reimbursement rate for a service that the State either  
15 must or has elected to include within Medi-Cal, federal law  
16 requires that the decision be based on a considered finding that  
17 in light of provider costs the rate reduction will not affect the  
18 quality of service afforded to beneficiaries or their equal  
19 access to such medical service.

## 20                   I. Facts and Procedural History

### 21           A. The Federal Medicaid Program

22       Medicaid is a federal program that distributes funds to  
23 states in order to provide health care services for poor persons  
24 who are aged, blind, disabled, or members of families with  
25 dependent children. 42 U.S.C. §§ 1396a-1396v. The program is  
26 jointly funded by the federal and state governments and is

1 administered by the states. The states determine eligibility,  
2 the types of services covered, payment levels for services, and  
3 other aspects of administration, within the confines of federal  
4 law. See Orthopaedic Hosp., 103 F.3d at 1493. Federal law  
5 requires participating states to provide a basic array of  
6 services and allows states to provide certain additional optional  
7 services, such as dental care, if they so choose. 42 U.S.C. §  
8 1396a(a)(10); Elizabeth Blackwell Health Ctr. for Women v. Knoll,  
9 61 F.3d 170, 173 (3d Cir. 1995).

10 In order to receive federal funds, a state prepares and  
11 submits a state plan, which describes the standards and methods  
12 to be used to set reimbursement rates for the services covered.  
13 Orthopaedic Hosp., 103 F.3d at 1494. The state plan must be  
14 approved by the Secretary of Health and Human Services. The  
15 Medicaid Act sets out the requirements of a state plan at 42  
16 U.S.C. § 1396a(a)(1)-(65). The provision central to these two  
17 suits is § 1396a(a)(30)(A) ("Section 30(A)"). Section 30(A)  
18 requires a state plan to:

19 provide such methods and procedures relating to the  
20 utilization of, and the payment for, care and services  
21 available under the plan . . . as may be necessary. . .  
22 to assure that payments are consistent with efficiency,  
23 economy, and quality of care and are sufficient to  
24 enlist enough providers so that care and services are  
25 available under the plan at least to the extent that  
26 such care and services are available to the general  
population in the geographic area.

These Section 30(A) standards are referred to as the "efficiency,  
economy, and quality" requirement and the "equal access"  
requirement.

1 The requirements of § 1396a, including Section 30(A), apply  
2 to Medicaid programs that operate on the traditional fee-for-  
3 service basis. Under this model, a Medicaid recipient may see  
4 any enrolled service provider, who is reimbursed directly by the  
5 state. 42 U.S.C. § 1395a. However, by way of a waiver from the  
6 Secretary of Health and Human Services, states have the  
7 alternative of contracting with managed care plans to provide  
8 some or all of the covered services in exchange for payment under  
9 a prepaid capitation rate or some other risk-based arrangement.  
10 42 U.S.C. § 1396b(m). Under this arrangement, the managed care  
11 plans receive predetermined periodic payments in return for  
12 providing the required services. Under 42 U.S.C. §  
13 1396b(m)(2)(A)(iii), the rates paid to the managed care plans  
14 must be made on an "actuarially sound basis." Under 42 U.S.C. §  
15 1396n(b)(4), the Secretary of Health and Human Services may grant  
16 the necessary waivers that permit a state to require Medicaid  
17 recipients to receive care through managed care programs, so long  
18 as the managed care providers "meet, accept, and comply with the  
19 reimbursement, quality, and utilization standards under the State  
20 plan, which standards . . . are consistent with access, quality,  
21 and efficient and economic provision of covered care and  
22 services."

23 B. The California Medi-Cal Program

24 California's Medicaid program is known as Medi-Cal. See  
25 Cal. Welf. & Inst. Code §§ 14000 et seq. It is administered by  
26 the California Department of Health Services. Medi-Cal operates

1 on both a fee-for-service and managed care basis. California has  
2 elected to provide 35 of the 36 available optional services.<sup>1</sup>  
3 (Menda Decl. Ex. A, p. 2.) The yearly cost of the Medi-Cal  
4 program to the State is \$12 billion. The federal government  
5 contributes something just over this amount to the State for the  
6 operation of Medi-Cal.

7 California has an extensive regulatory framework for the  
8 setting of reimbursement rates. See, e.g., Cal. Welf. & Inst.  
9 Code §§ 14075, 14079, 14105. However, on the basis of the record  
10 now before the court, it appears that the Department of Health  
11 Services does not have any continuous study of rates and their  
12 adequacy to meet the Section 30(A) requirements.<sup>2</sup> Nor is there  
13 any record that the State legislature - authorized by the State  
14 plan to make rate adjustments - has any ongoing study of rates  
15 independent of the Department of Health Services.

16 In January 2003 and again in May 2003, the then-Governor  
17

---

18  
19 <sup>1</sup> These optional services include: dental care; podiatry;  
20 optometry; physical therapy; occupational therapy; speech  
21 pathology; audiology; drugs; prosthetic appliances; eyeglasses;  
22 diagnostic, screening, preventive, and rehabilitative services;  
23 hospice; psychology; certified midwife; medical supplies; hearing  
24 aids; acupuncture; and drug addiction treatment and  
rehabilitation. (Menda Decl. ¶ 4.) In addition, Medi-Cal pays  
for illegal alien medical services provided by emergency rooms,  
which is the most expensive way in which to provide medical  
services that are not actual emergencies. (See Campbell Decl.  
Ex. D, p. 3.(illegal alien coverage costs \$852 million))

25 <sup>2</sup> According to the Legislative Analyst, the Department  
26 has "no rational basis" for its rate system and has not for many  
years. (Campbell Decl. Ex. D, p. 16.) The rates for various  
services have been adjusted a number of times over the last 15  
years, mostly on an "ad hoc" basis. (Id.)

1 proposed an across-the-board 15% rate cut in Medi-Cal  
2 reimbursement rates as part of his proposed budget. (S. Thompson  
3 Decl. ¶ 7.) When the State legislature failed to enact a budget  
4 by July 1, 2003 (as required by state law), a compromise budget  
5 proposal was negotiated. (Id. ¶ 9.) This proposal, which was  
6 ultimately enacted into law, includes a 5% cut in the Medi-Cal  
7 reimbursement rate. This rate cut applies across-the-board,  
8 though certain services are excepted. The rate cut is codified  
9 in Welf. & Inst. Code § 14105.19, as follows:

10 (a) Due to the significant state budget deficit  
11 projected for the 2003-04 fiscal year, and in order to  
12 implement changes in the level of funding for health  
13 care services, the Director of Health Services shall  
14 reduce provider payments as specified in this section.

(b) (1) Payments shall be reduced by 5 percent for  
Medi-Cal program services for dates of service on and  
after January 1, 2004.

15 The statute also requires the Department of Health Services to  
16 reduce the capitation payments to managed care plans by the  
17 "actuarial equivalent" of 5%. Welf. & Inst. Code §  
18 14105.19(b)(3). The actuarial equivalent of the reimbursement  
19 rate reduction varies depending on the characteristics of the  
20 managed care plan and its members, but the typical reduction is  
21 approximately 3%. (See Campbell Decl. Ex. E, pp. 1-3; Tough  
22 Decl. ¶ 6.) The rate cut is anticipated to save \$245 million in  
23 reimbursement costs borne by the State between January 1 and June  
24 30, 2004. (Menda Decl. ¶ 9.)

### 25 C. The Parties

26 The plaintiffs in CIV-S-03-2110 are a pharmacist enrolled as

1 a Medi-Cal provider and two Medi-Cal recipients. The plaintiffs  
 2 in CIV-S-03-2336 are all membership organizations that represent  
 3 the interests of Medi-Cal providers and recipients. Only one of  
 4 these organizations, the Disabled Rights Union, has members who  
 5 are Medi-Cal recipients. (See Edmon Decl. ¶¶ 3-4.) Others, for  
 6 example, the California Chapter of the American College of  
 7 Cardiology, have members who are Medi-Cal providers.<sup>3</sup> (See Watson  
 8 Decl. ¶ 3.) Two organizations, the Brain Injury Policy Institute  
 9 and the California Foundation for Independent Living, advocate on  
 10 behalf of Medi-Cal recipients, but have no Medi-Cal beneficiaries  
 11 as members. (See Vick Decl. ¶¶ 1-5; Yeager Decl. ¶ 3.)

12 Diana Bonta is the defendant in both suits. She is sued in  
 13 her official capacity as Director of the Department of Health  
 14 Services.<sup>4</sup>

## 15 II. Standing

16 The question of plaintiffs' standing is the first of a set  
 17 of interrelated issues relating to whether plaintiffs, or some of  
 18 them, may assert a claim under § 1983. Because standing affects  
 19 the court's jurisdiction to go any further, it must be addressed  
 20 first. But the standing inquiry is not independent of the two  
 21

---

22 <sup>3</sup> At least one of these, the AIDS Healthcare Foundation, is  
 23 itself a Medi-Cal provider. (Stidham Decl. ¶ 4.) The Foundation  
 operates a Medi-Cal managed care plan. (Id. ¶ 5.)

24 <sup>4</sup> Plaintiffs in CIV-S-03-2110 also name the Department of  
 25 Health Services as a defendant. However, the Department is  
 26 immune from suit under the 11th Amendment and, therefore, must be  
 dismissed, leaving Director Bonta as the sole defendant.  
Pennhurst State School & Hosp. v. Halderman, 465 U.S. 89, 100,  
 104 S.Ct. 900 (1984).

1 additional questions that must be addressed before reaching the  
2 merits of the dispute: (1) does the Medicaid statute confer any  
3 rights on either Medi-Cal providers or recipients that may be  
4 enforced by a private right of action under 42 U.S.C. § 1983; and  
5 (2) if there is such a right, what is the substance of that  
6 right? In the sections that follow the standing analysis, the  
7 court concludes that only Medi-Cal recipients have a claim under  
8 § 1983, not providers, and that this claim extends only so far as  
9 the equal access to quality care provisions of Section 30(A).  
10 Further, in keeping with Ninth Circuit precedent, the court finds  
11 that the right guaranteed by Section 30(A) has a large procedural  
12 component: Medi-Cal recipients are entitled to a considered rate  
13 making decisional process in which equal access to quality care  
14 is evaluated in relation to provider costs and the proposed rate.  
15 The standing analysis presages these conclusions by focusing on  
16 beneficiary standing to advance the procedural component of the  
17 Section 30(A) entitlement.

18       Standing consists of two broad levels of analysis, both of  
19 which are implicated in this case. The most basic analysis  
20 involves whether plaintiffs satisfy the constitutional minimum  
21 requirements of injury-in-fact, causation, and redressability.  
22 Courts have also crafted various prudential standing doctrines,  
23 two of which, associational standing and third-party standing,  
24 are at issue here. The first question is whether Medi-Cal  
25 beneficiaries and providers have Article III standing to seek to  
26 enjoin the 5% rate cut. The second question is whether Medi-Cal

1 providers have third-party standing to assert the rights of Medi-  
2 Cal beneficiaries. The final standing issue is whether  
3 beneficiary and provider organizations, who make up most of the  
4 plaintiffs in these suits, have associational standing to bring  
5 suit on behalf of their respective members.

6 A. Article III Standing of Medi-Cal Beneficiaries and  
7 Providers

8 To comply with the requirements of Article III standing, a  
9 plaintiff must satisfy three elements: injury-in-fact, causation,  
10 and redressability. See Lujan v. Defenders of Wildlife, 504 U.S.  
11 555, 560-61, 112 S.Ct. 2130 (1992).

12 The Article III standing analysis in this case is relatively  
13 straightforward. Medi-Cal beneficiaries and providers will  
14 suffer concrete injury caused by the 5% cut if it is permitted to  
15 go into effect. The injury to providers is obvious. As to  
16 beneficiaries, plaintiffs have presented sufficient evidence  
17 showing that at least some Medi-Cal providers will cease  
18 participating in the Medi-Cal program altogether or will refuse  
19 to take on new Medi-Cal patients if rates are reduced by 5%.<sup>5</sup>

---

20  
21 <sup>5</sup> For instance, one practice group that provided primary  
22 care and OB/GYN services for 1500 Medi-Cal fee-for-service  
23 patients will stop providing anything but OB/GYN services to  
24 those patients, and may discontinue even those services as well.  
25 (Polansky Supp. Decl. ¶ 4.) Another provider is one of the only  
26 dermatological practices in the Bay Area to treat Medi-Cal  
patients. (Geisse Decl. ¶ 6.) Appointments for Medi-Cal  
patients are already restricted to "children, emergencies, severe  
debilitating dermatologic conditions, and cancer victims." (*Id.*)  
After the rate reduction, this practice will have to stop taking  
most new Medi-Cal patients. (*Id.* ¶ 11.) Additionally,  
plaintiffs have presented statistical evidence that physician  
participation in Medi-Cal was low before the rate reduction.

(See, e.g., Mazer Decl. ¶ 9; Kuon Decl. ¶ 10.) This reduction in the number of providers in the program will adversely affect beneficiaries' equal access to medical care and, quite possibly, its quality.

Moreover, as to redressability, an injunction prohibiting the rate reduction at least until a proper study of reimbursement rates has been conducted would redress providers' and beneficiaries' impending injury. Under the relaxed redressability standards applicable in procedural standing cases,<sup>6</sup> plaintiffs need demonstrate only that proper consideration of

---

(Bindman Decl. Ex. A, p. 2.) All of this evidence tends to confirm the statements made in many declarations that reimbursement rates for many services are already set below providers' costs. (See, e.g., Yelamanchili Decl. ¶ 10; Coughlin Decl. ¶ 7.)

<sup>6</sup> Plaintiffs seek to vindicate what is in part a procedural right, the right to have the State of California consider certain factors when setting Medi-Cal reimbursement rates. See Orthopaedic Hosp., 103 F.3d at 1500; infra at 32-34. This is a "procedural right" in the sense that it is a "procedural requirement the disregard of which could impair a separate and concrete interest of" plaintiffs (i.e., Medi-Cal beneficiaries' interest in receiving equal access to medical care). Lujan, 504 U.S. at 572. In a case involving a procedural right, the standards of redressability and causation applied in normal standing cases are relaxed. See Laub v. U.S. Dep't of the Interior, 342 F.3d 1080, 1086-87 (9th Cir. 2003); Hall v. Norton, 266 F.3d 969, 975 (9th Cir. 2001); Lujan, 504 U.S. at 572 & n.7. Plaintiffs in a procedural standing case need not establish that, were the government to follow the proper procedures, its ultimate action would be different. Instead, plaintiffs in a procedural standing case need demonstrate only that the factors the government failed to consider could have an influence on the ultimate outcome. Laub, 342 F.3d at 1087; Hall, 266 F.3d at 977. Thus, in order to establish causation and redressability, plaintiffs in this case need demonstrate only that consideration of Medi-Cal providers' costs in relation to equal access to quality services could influence the reimbursement rates the State ultimately sets.

1 provider costs in setting Medi-Cal reimbursement rates could  
2 influence the ultimate level at which those rates are set. See  
3 Laub, 342 F.3d at 1087; Hall, 266 F.3d at 977. Plaintiffs have  
4 made this demonstration. Thus, both Medi-Cal providers and  
5 beneficiaries have Article III standing to pursue this case.

6 B. Third-Party Standing

7 In addition to advancing their own interests, the provider  
8 organization plaintiffs seek to assert the interests of their  
9 Medi-Cal beneficiary patients. To assert such third-party  
10 standing, the person or entity seeking to represent another: (1)  
11 must have suffered an injury-in-fact, (2) must have a close  
12 relationship with the third party, and (3) there must be "some  
13 hindrance" or a "genuine obstacle" to the third party's ability  
14 to assert its own interests. Powers v. Ohio, 499 U.S. 400, 410-  
15 411, 111 S.Ct. 1364 (1991); Singleton v. Wulff, 428 U.S. 106,  
16 112-116, 96 S.Ct. 2868 (1976). All of these criteria are  
17 satisfied in this case.

18 Medi-Cal providers will suffer a concrete economic injury if  
19 the 5% cut in their reimbursement rate is implemented. Moreover,  
20 Medi-Cal providers have a sufficiently close relationship with  
21 their patients who are Medi-Cal beneficiaries to meet the second  
22 factor in the third-party standing analysis. Indeed, the  
23 providers are in a unique position to advance the interests of  
24 Medi-Cal beneficiaries, since it is they who can predict the  
25 effect of a reimbursement rate cut on the services they intend to  
26 provide. See, e.g., Singleton, 428 U.S. at 117 (explaining that

1 a patient cannot secure medical services without the aid of a  
2 doctor and that an impecunious patient cannot secure medical  
3 services without his or her doctor's being reimbursed by the  
4 government for the doctor's services).

5 Whether Medi-Cal beneficiaries face "some hindrance" or a  
6 "genuine obstacle" to their ability to assert their own rights is  
7 a closer question. Here, the obstacle Medi-Cal beneficiaries  
8 face is a lack of information about the effect of Medi-Cal  
9 reimbursement rates on providers in light of providers' costs and  
10 the further effect of a rate cut on the provision of services to  
11 Medi-Cal beneficiaries.<sup>7</sup> Providers are the ones who know the  
12 relationship of reimbursement to service and to their costs. As  
13 compared to beneficiaries, they are in a far better position to  
14 evaluate the State's decisional process and the data relied upon  
15 by the State in determining reimbursement rates. This  
16 informational hurdle is similar in kind to those found sufficient  
17 in Powers and Singleton to confer third-party standing, and it

---

18  
19 <sup>7</sup> The Supreme Court has in the past recognized a lack of  
20 incentive in the form of "practical barriers to suit" because of  
21 "the small financial stake involved and the economic burdens of  
22 litigation" as an obstacle sufficient for third-party standing  
23 purposes. Powers, 499 U.S. at 414-415. Defendant points out  
24 that the Ninth Circuit has held that "[a] simple lack of  
25 motivation does not constitute a 'genuine obstacle' to asserting  
26 an interest." Viceroy Gold Corp. v. Aubry, 75 F.3d 482, 489 (9th  
Cir. 1996) (holding that an employer does not have third-party  
standing to challenge a labor statute on its employees' behalf  
simply because the "employees probably would not be motivated to  
assert their own interests because they lack a sufficient  
individual economic stake in the outcome"). There seems to be  
some tension between Powers and Viceroy Gold on this point, but  
it is not material to the "genuine obstacle" analysis in this  
case.

1 suffices, at least at this point in the litigation, to confer  
2 third-party standing on Medi-Cal providers to assert the  
3 interests of their patients who are Medi-Cal beneficiaries.

4 C. Associational Standing

5 In CIV-S-03-2336, all of the plaintiffs are organizations  
6 whose members are either Medi-Cal providers or Medi-Cal  
7 beneficiaries. Under Hunt v. Wash. State Apple Adver. Comm'n,  
8 432 U.S. 333, 343, 97 S.Ct. 2434 (1977), an organization has  
9 standing to sue on behalf of its members if "(a) its members  
10 would otherwise have standing to sue in their own right; (b) the  
11 interests it seeks to protect are germane to the organization's  
12 purpose; and (c) neither the claim asserted nor the relief  
13 requested requires the participation of individual members in the  
14 lawsuit."

15 1. Beneficiary Organizations

16 The only true beneficiary organization is the Disabled  
17 Rights Union.<sup>8</sup> It has about 400 members, the "vast majority" of  
18 whom are Medi-Cal beneficiaries.<sup>9</sup> (Edmon Decl. ¶ 3.) In light of  
19

---

20 <sup>8</sup> Defendant argues that there is no evidence (outside of  
21 plaintiffs' affidavits) of the existence of this organization, in  
22 that there is no record of its registration with the California  
23 Secretary of State or the Attorney General. However, a  
24 supplemental declaration from Beverly Edmon, the director of the  
25 Disabled Rights Union, makes clear that the Disabled Rights Union  
26 is a bona fide organization that has been registered with the  
Secretary of State since 1981 as "an unincorporated nonprofit  
association." (Edmon Suppl. Decl. ¶ 3.)

<sup>9</sup> At the hearing on this motion, defendant also pointed out  
that Ms. Edmon is not herself a Medi-Cal beneficiary. This is  
irrelevant for purposes of determining whether the Disabled  
Rights Union has associational standing to assert its members'

1 its membership and purpose, the first two steps of the  
2 associational standing test are met: Medi-Cal beneficiaries  
3 would have standing to sue in their own right, and one of the  
4 purposes of the Disabled Rights Union is to help Medi-Cal  
5 recipients obtain access to Medi-Cal services. (Edmon Decl. ¶¶  
6 4, 6, 8.) The final requirement - whether the claim or relief  
7 requires individual members to participate - is also satisfied.  
8 As the Third Circuit recently pointed out in a case based on  
9 similar facts, "[t]he need for some individual participation . .  
10 . does not necessarily bar associational standing under this  
11 third criterion." Pa. Psychiatric Soc'y v. Green Spring Health  
12 Servs., Inc. ("PPS"), 280 F.3d 278, 283 (3d Cir. 2002).  
13 Here, plaintiffs seek only injunctive relief such that an  
14 individualized showing on damages will not be required.  
15 Moreover, whatever individualized showing may be made as to  
16 access and quality, a significant component of plaintiffs' claim  
17 is directed at the State's failure to follow a considered  
18 decisionmaking process as required by Orthopaedic Hospital.  
19 Evidence about what the State considered - or failed to consider  
20 - when it enacted the rate reduction will not require  
21 individualized proof by beneficiary members. See PPS, 280 F.3d  
22 at 286.

23  
24  
25  
26  

---

interests. Ms. Edmon's declarations state that the "vast  
majority" of the Disabled Rights Union's members are Medi-Cal  
beneficiaries.

1           2. Provider Organizations

2           The next question is whether the provider organizations that  
3 make up most of the plaintiffs in these suits have associational  
4 standing to assert both the direct interests of their Medi-Cal  
5 provider members and their members' third-party interest in  
6 protecting the rights of their Medi-Cal patients.

7           Medi-Cal providers have standing to sue in their own right  
8 to enjoin a reimbursement cut.<sup>10</sup> Less well-established is whether  
9 a provider organization may claim associational standing to  
10 assert the interests of beneficiaries, where association members  
11 have third-party standing on behalf of beneficiaries. In the  
12 most analogous case, the Third Circuit found that associational  
13 standing followed from the third party standing of association  
14 members. In that case an organization of psychiatrists was  
15 permitted to assert the interests of patients because its  
16 members' individually had third party standing to advance their  
17 patients' interests. See PPS, 280 F.3d at 291; Tacy F. Flint, A  
18 New Brand of Representational Standing, 70 U.Chi.L.Rev. 1037  
19 (2003) (arguing that there is no constitutional impediment to  
20 combining associational and third party standing). The reasoning  
21 in PPS is persuasive. As to the second Hunt factor, there is no  
22 dispute that the interests of Medi-Cal providers and  
23 beneficiaries are germane to the purposes of these organizations.

---

24  
25           <sup>10</sup> Defendant argues that Medi-Cal providers lack standing  
26 because they do not have a right to enforce 42 U.S.C. §  
1396a(a)(30)(A) under 42 U.S.C. § 1983. (Def.'s Opp'n at 7-8.)  
This is not an argument about standing but about the merits of  
the providers' legal theory.

1 Finally, for the same reasons discussed above in the context of  
2 beneficiary organizations, individual participation by members is  
3 not necessary. Thus, the provider organizations here have  
4 standing to assert the interests of providers and beneficiaries  
5 alike.

6 III. Existence of an Enforceable Right Under 42 U.S.C. § 1983

7 The plaintiffs bring suit under 42 U.S.C. § 1983, which  
8 provides a remedy for persons who are deprived of "any rights,  
9 privileges, or immunities secured by the Constitution and laws."

10 The Supreme Court has held that the phrase "and laws" permits  
11 persons to sue for the violation of rights secured to them by  
12 federal statute. See Maine v. Thiboutot, 448 U.S. 1, 4-8, 100  
13 S.Ct. 2502 (1980). However, not all federal statutes create  
14 individual rights that can be enforced through § 1983. See  
15 Blessing v. Freestone, 520 U.S. 329, 340, 117 S.Ct. 1353 (1997).  
16 The Court has developed a three factor test to determine whether  
17 a federal statutory provision creates an enforceable right: (1)  
18 Congress must have intended that the provision benefit the  
19 plaintiff; (2) the right must not be so "vague and amorphous"  
20 that its enforcement would strain judicial competence; and (3)  
21 the statute must unambiguously impose a binding obligation on the  
22 states. Id. at 340-41.

23 The Court recently clarified this test in Gonzaga University  
24 v. Doe, 536 U.S. 273, 283, 122 S.Ct. 2268 (2002). The plaintiff  
25 in Gonzaga brought suit under § 1983 to enforce a provision in  
26 the Family Educational Rights and Privacy Act (FERPA), which

1 limits the release of a student's educational records without  
2 permission. The Court found that FERPA does not confer an  
3 enforceable right because the language of the statute does not  
4 focus on the protected student, but rather on the Secretary and  
5 the educational institution, and is couched in terms of a "policy  
6 and practice" rather than any one individual's entitlement.  
7 Moreover, the Court found that the structure of the statute also  
8 suggests that Congress did not intend to create a right under §  
9 1983 because the statute provides for an administrative remedy.  
10 In reaching its holding, the Court rejected the view that it is  
11 enough for a plaintiff to show membership in a group generally  
12 benefitted by a statute; rather, "[f]or a statute to create such  
13 private rights, its text must be 'phrased in terms of the persons  
14 benefitted,'" not the person regulated or any aggregate group.  
15 Id. at 284. Thus, Gonzaga requires close attention to the  
16 wording and structure of a statute to determine whether Congress  
17 has created an individual entitlement that may give rise to a  
18 claim under section 1983.

19 There is an additional complication in applying the Gonzaga  
20 test to § 1396a of the Medicaid statute. In two identical  
21 statutes, Congress spoke directly, if opaquely, to the approach  
22 courts should use in determining whether Congress intended to  
23 create an enforceable right in different portions of the Social  
24 Security Act, including its Medicaid provisions. See 42 U.S.C.  
25 §§ 1320a-2 & 1320a-10. These statutes are identically worded,  
26 and the fact that there are two such statutes is probably a

1 mistake.<sup>11</sup> The statutes provide as follows:

2 In an action brought to enforce a provision of this  
3 chapter, such provision is not to be deemed  
4 unenforceable because of its inclusion in a section of  
5 this chapter requiring a State plan or specifying the  
6 required contents of a State plan. This section is not  
7 intended to limit or expand the grounds for determining  
8 the availability of private actions to enforce State  
9 plan requirements other than by overturning any such  
10 grounds applied in Suter v. Artist M., 112 S.Ct. 1360  
11 (1992), but not applied in prior Supreme Court  
12 decisions respecting such enforceability; provided,  
13 however, that this section is not intended to alter the  
14 holding in Suter v. Artist M. that section 671(a)(15)  
15 of this title is not enforceable in a private right of  
16 action. 42 U.S.C. § 1320a-2.

17 The two statutes were enacted in 1994 after the Court's decision  
18 in Suter v. Artist M., 503 U.S. 347, 112 S.Ct. 1360 (1992).<sup>12</sup> The  
19 intended effect of the statutory language is at best uncertain  
20 because the reference to "any such grounds applied in [Suter],  
21 but not applied in prior Supreme Court decisions" is open to  
22 interpretation. However, "the fairest reading of Section 1320a-2  
23 [and 1320a-10] is that Congress was concerned . . . that a court  
24 should not eviscerate an otherwise enforceable right merely  
25 because it appears in a statute mandating that participating  
26 states include a particular provision in their state plans."  
27 Messier v. Southbury Training School, 916 F.Supp. 133, 144-45  
28 (D.Conn. 1996); see also Harris v. James, 127 F.3d 993, 1002-03  
29 (11th Cir. 1997). But see LaShawn A. v. Barry, 69 F.3d 556, 568-

---

24 <sup>11</sup> See Pub. L. 103-382 (42 U.S.C. § 1320a-2); Pub. L. 103-  
25 432 (42 U.S.C. § 1320a-10).

26 <sup>12</sup> The Supreme Court did not consider the effect of this  
statute in Blessing, which dealt with Title IV-D of the Social  
Security Act. Blessing, 520 U.S. at 332.

70 (D.C. Cir. 1995), vacated by 87 F.3d 303 (1996) (holding that, because Suter did not use an approach different from past cases, §§ 1320a-2 & 1320a-10 are without any effect). In light of sections 1320a-2 and 1320a-10, when applying Gonzaga to the particular sections of the Medicaid Act at issue here, the court will not consider that an individual entitlement is absent simply because the wording of the statute is directed to the required contents of a state plan as opposed to the rights of a beneficiary or provider under a plan. Thus, provisions that require certain contents in state plans can create rights enforceable under § 1983, so long as they otherwise meet the test employed by the Court in Suter, Blessing and Gonzaga.<sup>13</sup>

A. Section 30(A)

Plaintiffs contend that Section 30(A) creates an individual right for both Medicaid providers and beneficiaries. They rely primarily on the Ninth Circuit's decision in Orthopaedic Hospital v. Belshe, 103 F.3d 1491 (9th Cir. 1997), and the Supreme Court's decision in Wilder v. Virginia Hospital Association, 496 U.S. 498, 110 S.Ct. 2510 (1990). In Orthopaedic Hospital, the Ninth Circuit held that a Medi-Cal rate reduction violated Section 30(A). 103 F.3d at 1496. The case was brought under § 1983 by a

---

<sup>13</sup> The court respectfully notes that Congress would give greater assistance to the courts, and retain its proper authority over an important policy and political question - when and by whom suit may be brought - by directly stating which provisions give rise to a claim under section 1983, and for whom, rather than commenting, in vague language, on particular approaches adopted by the Supreme Court to divine Congress' unexpressed intent.

1 provider hospital, and the district court had held that Section  
 2 30(A) creates an enforceable right for Medicaid providers.<sup>14</sup>  
 3 (Bookman Decl. Ex. A, p. 7.) However, this question was not  
 4 addressed by the Ninth Circuit and apparently was not put in  
 5 issue on appeal. Since the question was not actually decided by  
 6 the court, but only assumed, Orthopaedic is not binding on  
 7 whether providers have an enforceable right under Section 30(A)  
 8 and § 1983. See Sorenson v. Mink, 239 F.3d 1140, 1149 (9th Cir.  
 9 2001) ("unstated assumptions on non-litigated issues are not  
 10 precedential holdings"); Estate of Magnin v. Comm'r, 184 F.3d  
 11 1074, 1077 (9th Cir. 1999).

12 The plaintiffs' reliance upon the Supreme Court's decision  
 13 in Wilder is similarly unavailing. Wilder did not deal with  
 14

---

15 <sup>14</sup> Plaintiffs contend that this holding of the district  
 16 court precludes the defendant from arguing that Section 30(A)  
 17 does not create an enforceable right. (CMA's Mot. at 19-21.)  
 18 The court, however, declines to find preclusion. First, the  
 19 district court's June 28, 1991 decision in Orthopaedic Hospital  
 20 came before the Supreme Court's decisions in Suter, Blessing, and  
 21 Gonzaga, which refined the enforceable rights analysis. See  
 22 Steen v. John Hancock Mut. Life Ins. Co., 106 F.3d 904, 914 (9th  
 23 Cir. 1997) (holding that collateral estoppel does not apply when  
 24 there is a "significant change in the legal climate"). Second,  
 25 because of the unique position of the government in litigation, a  
 26 state should not ordinarily be subjected to nonmutual offensive  
 issue preclusion. See United States v. Mendoza, 464 U.S. 154,  
 162-63, 104 S.Ct. 568 (1984) (holding that nonmutual offensive  
 issue preclusion does not apply against federal government);  
Hercules Carriers, Inc. v. Claimant Fla., 768 F.2d 1558,  
 1577-1582 (11th Cir. 1985) (holding that nonmutual offensive  
 issue preclusion is not available against the state government);  
Chambers v. Ohio Dep't of Human Servs., 145 F.3d 793, 801 n.14  
 (6th Cir. 1998) (holding that nonmutual issue preclusion should  
 not apply against the state government); Helene Curtis, Inc. v.  
Assessment Appeals Bd., 76 Cal.App.4th 124, 133, 90 Cal.Rptr.2d  
 31 (1999) (holding that, as a matter of state law, nonmutual  
 offensive issue preclusion does not apply against the state).

1 Section 30(A) but with another provision of the Medicaid Act, 42  
2 U.S.C. § 1396a(a)(13)(A), the Boren Amendment, which subsequently  
3 has been repealed. 496 U.S. at 501. The Court in Wilder held  
4 that the Boren Amendment created an enforceable right for  
5 Medicaid providers. Id. The Boren Amendment required states to  
6 pay certain providers rates that "the State finds, and makes  
7 assurances satisfactory to the Secretary, are reasonable and  
8 adequate to meet the costs which must be incurred by efficiently  
9 and economically operated facilities in order to provide care and  
10 services in conformity with applicable State and Federal laws."  
11 Id. at 503. Plaintiffs argue that the language of Section 30(A)  
12 is indistinguishable from the Boren Amendment.

13 Even assuming the continued vitality of Wilder after  
14 Gonzaga, the language of Section 30(A) is not the same as that of  
15 the Boren Amendment. Both the Fifth and the Third Circuits have  
16 so held. See Pa. Pharmacists Ass'n v. Houstoun, 283 F.3d 531,  
17 538 (3d Cir. 2002) (en banc) ("The language of Section 30(A)  
18 contrasts sharply with that of the Boren Amendment. . . .");  
19 Evergreen Presbyterian Ministries, Inc. v. Hood, 235 F.3d 908,  
20 926-28 (5th Cir. 2000) ("However, in contrast to the Boren  
21 Amendment, section 30(A) does not create an individual  
22 entitlement in favor of any provider."). Gonzaga makes clear  
23 that a court must examine the specific statutory provision at  
24 issue in determining whether it creates an enforceable right.  
25 Thus, the question here is whether Section 30(A), not the  
26 repealed Boren Amendment, creates an enforceable right under the

standards announced in Gonzaga, as modified by 42 U.S.C. §§ 1320a-2 and 1320a-10.

1. Congressional Intent to Confer a Right

The first step under Gonzaga is to determine whether Congress unambiguously intended to create an enforceable right. Gonzaga, 536 U.S. at 280. The focus is on the text and structure of the statute. Id. at 284-86. As the Third Circuit has found, the efficiency and economy requirements of Section 30(A) are aimed at benefitting the State and preserving Medi-Cal/Medicaid funds. Pa. Pharmacists, 283 F.3d at 537. Neither requirement assists either providers or beneficiaries. Moreover, as both the Third and Fifth Circuits further found, quality and access do not benefit providers, but do directly benefit beneficiaries. Id.; Evergreen Presbyterian Ministries, 235 F.3d at 928-29. Further in favor of a claim by beneficiaries, the two requirements are not phrased in aggregate or indirect terms - such as requiring a general policy or requiring substantial compliance - that might suggest that no single beneficiary is entitled to quality care or equal access. Thus, the statutory language suggests that providers do not have an enforceable right under § 1983, but that beneficiaries do.

Admittedly, as to beneficiaries, the language of Section 30(A) is not the paragon of rights-creating language, like Title VI of the Civil Rights Act. However, the structure of § 1396a(a), as a list of requirements that a state plan must meet, largely prevented Congress from using the sort of "no person

1 shall" language cited by the Gonzaga Court. And it is precisely  
2 this structure -- a provision's inclusion as a requirement of a  
3 state plan -- that Congress, in §§ 1320a-2 and 1320a-10, directed  
4 the courts to ignore when determining whether the provision  
5 creates an enforceable right under § 1983. Moreover, it has been  
6 generally understood, even after Suter and Blessing, that Section  
7 30(A) creates an enforceable right for recipients. See Pa.  
8 Pharmacists, 283 F.3d at 544 ("Medicaid recipients plainly  
9 satisfy the intended-to-benefit requirement and are thus  
10 potential private plaintiffs."); Evergreen Presbyterian  
11 Ministries, 235 F.3d at 928 ("[T]he recipient plaintiffs have an  
12 individual entitlement to the equal access guarantee of section  
13 30(A)."). Finally, unlike the statute in Gonzaga, a Medi-Cal  
14 beneficiary can resort to no administrative procedure to seek  
15 quality care or equal access.

16 Such legislative history as there is also supports the  
17 conclusion that Congress intended a private enforcement action  
18 under section 1983 for beneficiaries but not for providers.  
19 When the Boren Amendment was repealed, the legislative history  
20 indicates a congressional intent to end provider suits. See H.R.  
21 Rep. No. 105-149, at 590 (1997) ("It is the Committee's intention  
22 that, following enactment of this Act, neither this nor any other  
23 provision of [42 U.S.C. § 1396a] will be interpreted as  
24 establishing a cause of action for hospitals and nursing  
25 facilities relative to the adequacy of the rates they receive.").  
26 Indeed, this was Congress' "dominant objective." Pa.

1 Pharmacists, 283 F.3d at 540 n.15. On the other hand, in passing  
2 certain 1981 amendments to section 30(A), Congress noted that "in  
3 instances where the States or the Secretary fail to observe these  
4 statutory requirements, the courts would be expected to take  
5 appropriate remedial action." H.R. Rep. No. 97-158, at 301  
6 (1981). As the Third Circuit noted, this statement suggests  
7 that Congress intended that some class of plaintiffs, such as  
8 beneficiaries, would be able to enforce the terms of section  
9 30(A) by private suit under § 1983.

10 The court holds that in Section 30(A) Congress created  
11 rights to quality care and equal access that may be enforced by  
12 Medicaid recipients under § 1983. However, the language of the  
13 statute does not unambiguously create such rights in Medicaid  
14 providers, given that economy, efficiency, quality, and equal  
15 access do not evince an intent to benefit providers. The focus  
16 of Section 30(A), and the Medicaid Act generally, is upon  
17 Medicaid recipients. Providers are benefitted only incidentally,  
18 not directly, and Gonzaga clarifies that simply receiving a  
19 benefit is not enough to demonstrate the intentional creation of  
20 an enforceable right. The two circuit courts to have considered  
21 the enforceability of Section 30(A) most recently both decided  
22 that Congress intended to create a right for Medicaid recipients  
23 but not providers. Pa. Pharmacists, 283 F.3d at 544; Evergreen  
24 Presbyterian Ministries, 235 F.3d at 928-29. The court follows  
25 these holdings and the reasoning of these decisions.  
26

1           2. Vague and Ambiguous

2           The second factor in the enforceable rights analysis is  
3 whether the right at issue is too vague and ambiguous for  
4 judicial enforcement. As previously discussed, Section 30(A) is  
5 intended to create a right to both quality care and equal access.  
6 Equal access - access equivalent to privately insured persons in  
7 the same geographic area - is sufficiently definite for  
8 enforcement by courts. See, e.g., Evergreen Presbyterian  
9 Ministries, 235 F.3d at 930 (agreeing with "the many other courts  
10 that have addressed the equal access provision that it is not too  
11 vague and amorphous to be beyond the competence of the judiciary  
12 to enforce").

13           The term "quality of care" is less definite. Unlike the  
14 access language, there is no point of reference - for example,  
15 equal in quality to that received by the general population in  
16 the geographic area. However, the Ninth Circuit has already  
17 construed the term "quality of care" as meaning that rates must  
18 "bear a reasonable relationship to efficient and economical  
19 [providers'] costs." Orthopaedic Hosp., 103 F.3d at 1496. This  
20 formulation requires the State to consider providers' costs in  
21 setting rates. Given this construction, further discussed below,  
22 the right of recipients to quality care is not so vague and  
23 ambiguous that its enforcement would strain judicial competence.<sup>15</sup>

---

25           <sup>15</sup> The court expresses no opinion as to whether a claim to  
26 quality services would be judicially manageable where the issue  
were other than whether rates have been set in consideration of  
cost of service.

1                   3. Binding Obligation

2           The final factor in the enforceable rights analysis is  
3 whether the statutory provision imposes a binding obligation on  
4 the states. Gonzaga, 536 U.S. at 282. The provision must be  
5 phrased in "mandatory, rather than precatory, terms." Id.  
6 (quoting Blessing, 520 U.S. at 340-41.). Although Medicaid is an  
7 optional program, once a state elects to participate, the  
8 contents of the state plan specified in § 1396a(a) are required,  
9 not optional. Section 30(A) uses only mandatory language. It  
10 imposes a binding obligation on any state that participates in  
11 the Medicaid program.

12           In sum, the quality and access provisions of Section 30(A)  
13 meet the Supreme Court's three factor test, as clarified in  
14 Gonzaga, for finding a statutory right enforceable through §  
15 1983. However, this right extends only to recipients and not to  
16 providers.

17                   B. Managed Care Provisions

18           There are two Medi-Cal managed care provisions that the  
19 plaintiffs claim create rights enforceable under § 1983: 42  
20 U.S.C. §§ 1396b(m)(2)(A)(iii) and 1396n(b)(4). Section  
21 1396b(m)(2)(A)(iii) requires states to pay "actuarially sound"  
22 rates to Medicaid managed care plans. Nothing in this provision  
23 benefits, or creates rights for, Medicaid recipients. By  
24 contracting with the State, the managed care plan must guarantee  
25 to provide services to recipients. (Pierson Decl. ¶ 3.) The  
26 actuarial soundness provision does not add anything that directly

benefits the recipients, such as requirements of quality care or equal access. Moreover, it is at least unclear that the actuarial soundness provision is intended to create a right for providers to a certain reimbursement rate. It is equally plausible that the section is intended to protect the State plan from overpayment.

The plaintiffs argue that the applicable regulation suggests that the term "actuarially sound" is intended to benefit providers. (CMA's Reply at 33.) However, even assuming that it is permissible to base a § 1983 right on a regulation,<sup>16</sup> the applicable regulation is itself far from clear:

Actuarially sound capitation rates means capitation rates that--

- (A) Have been developed in accordance with generally accepted actuarial principles and practices;
- (B) Are appropriate for the populations to be covered, and the services to be furnished under the contract; and
- (C) Have been certified, as meeting the requirements of this paragraph (c), by actuaries who meet the qualification standards established by the American Academy of Actuaries and follow the practice standards established by the Actuarial Standards Board. 42 C.F.R. § 438.6(c)(1)(I).

Plaintiffs argue that the requirement that the rates be

---

<sup>16</sup> Whether federal regulations can create rights enforceable under § 1983 is not at all clear. However, there are good reasons to think that they cannot. See Wright v. City of Roanoke Redev. & Hous. Auth., 479 U.S. 418, 437-38, 107 S.Ct. 766 (1987) (O'Connor, J., dissenting) (noting concerns with allowing regulations to create enforceable rights); S. Camden Citizens in Action v. N.J. Dep't of Env'tl. Prot., 274 F.3d 771, 790 (3d Cir. 2001) (holding that regulations do not create enforceable rights when they are too far removed from congressional intent).

1 "appropriate for the populations to be covered, and the services  
2 to be furnished under the contract" is intended to create a right  
3 to a minimum payment level for providers. (CMA's Reply at 33.)  
4 But plaintiffs read too much into the word "appropriate." The  
5 plain meaning of this regulation is that to be "actuarially  
6 sound" a rate must be based on the demographics of the area to be  
7 served and the services provided there. Nothing in this concept  
8 requires any particular level of reimbursement or consideration  
9 of provider costs. In light of Gonzaga, this language is too  
10 oblique to create an enforceable right under § 1983 for  
11 providers.

12 The second managed care provision at issue, § 1396n(b)(4),  
13 states that:

14 The Secretary, to the extent he finds it to be  
15 cost-effective and efficient and not inconsistent with  
16 the purposes of this subchapter, may waive such  
17 requirements of section 1396a of this title . . . as  
18 may be necessary for a State- . . . (4) to restrict the  
19 provider from (or through) whom an individual (eligible  
20 for medical assistance under this subchapter) can  
21 obtain services (other than in emergency circumstances)  
22 to providers or practitioners who undertake to provide  
23 such services and who meet, accept, and comply with the  
24 reimbursement, quality, and utilization standards under  
25 the State plan, which standards shall be consistent  
26 with the requirements of section 1396r-4 of this title  
and are consistent with access, quality, and efficient  
and economic provision of covered care and services, if  
such restriction does not discriminate among classes of  
providers on grounds unrelated to their demonstrated  
effectiveness and efficiency in providing those  
services and if providers under such restriction are  
paid on a timely basis in the same manner as health  
care practitioners must be paid under section  
1396a(a)(37)(A) of this title. 42 U.S.C. §  
1396n(b)(4).

The convoluted grammar of this section defeats authoritative

1 interpretation. But unlike Section 30(A), § 1396n(b)(4) does not  
2 directly confer a right to equal access to quality care upon  
3 Medi-Cal beneficiaries. Rather, the section permits the  
4 following sequence:

5 1. The Secretary in his guided discretion ("to the extent  
6 he finds it to be cost-effective and efficient and not  
7 inconsistent with the purposes" of Medicaid);

8 2. May waive other requirements of § 1396a and grant  
9 permission to a state to create managed care programs that  
10 restrict beneficiaries to certain managed care providers;

11 3. If the providers agree to comply with the state plan,  
12 including the requirements of "access, quality, and efficient and  
13 economic provision" of services.

14 The apparent intention of this provision is not to benefit  
15 Medi-Cal recipients, who would otherwise have a greater degree of  
16 choice of providers under the fee-for-service system, but to  
17 benefit the state plan by providing a possibly more cost-  
18 effective way to provide medical services.

19 Furthermore, this provision, and managed care in general,  
20 inserts the managed care plan as an intermediary between the  
21 patient-recipient and the practitioner-providers. In the fee-  
22 for-service context, it is the State itself that is obligated to  
23 provide access to quality services to Medi-Cal beneficiaries. In  
24 the managed care system, it is the managed care plan that  
25 assumes, by its contract with the State, the obligation of  
26 providing access and quality services to beneficiaries. The two

1 examples of plan contracts in the record contain quite detailed  
2 provisions relating to the quality of services and the managed  
3 care plan's duty to provide access to those services.<sup>17</sup> (See  
4 Pierson Decl. Exs. 1 & 2.) If the managed care plan fails to  
5 provide required services, then there are internal grievance  
6 procedures for plan members, and the State may also take action  
7 against the provider for failing to adhere to its contract. (Id.  
8 Ex. 1, pp. 8-34, 8-36.) Under the contract, whatever the  
9 capitation rates paid to the managed care provider, the duties  
10 owed by the provider do not vary. For example, the managed care  
11 plans are specifically bound by contract to "maintain adequate  
12 numbers and types of specialists within the network." (Id., p.  
13 7-4.) If a plan causes too many of its specialists to stop  
14 seeing Medi-Cal patients, by passing along the full capitation  
15 rate reduction to its doctors, then the plan will be in breach of  
16 its contract with the State. If a beneficiary plan member is  
17 denied needed medical treatment because the plan has failed to  
18 enroll specialists, then the beneficiary may initiate an  
19 administrative proceeding. If the managed care plan defaults  
20 because of the capitation rate, then Medi-Cal beneficiaries will  
21 be eligible for regular fee-for-service coverage. In sum, §  
22 1396n(b)(4) is directed toward the relationship between the State  
23 and the managed care plan, has little direct effect upon the

---

24  
25 <sup>17</sup> For example, the Health Net of California plan contract  
26 requires Health Net to maintain a network of primary care  
physicians, who are located within thirty minutes or ten miles of  
beneficiaries' residences. (Pierson Decl. Ex. 2, Exhibit A,  
Attachment 6.8.)

1 services made available to beneficiaries, and does not provide a  
2 standard by which capitation rates can be evaluated. Under  
3 Gonzaga, beneficiaries are too indirectly benefitted, if at all,  
4 by § 1396n(b)(4) to assert a right enforceable under § 1983.

5 Section 1396n(b)(4) also fails to create any right for the  
6 managed care plans themselves. The quality and access language  
7 does not benefit the plan. Moreover, the managed care plan's  
8 relationship with the State is contractual. If the State has  
9 breached its contract by lowering the payment to the plan, then  
10 the plan's remedy is a breach of contract action in state court.  
11 If the contract allows the State to reduce rates in this manner,  
12 then that is a risk assumed by the plan. Section 1396n(b)(4)  
13 affords no rights to managed care providers in their dealings  
14 with the State.

#### 15 IV. The Scope of Plaintiffs' Rights

16 Having decided that the beneficiary plaintiffs who are not  
17 in managed care plans have rights to equal access and quality  
18 care enforceable under § 1983, the court must determine the scope  
19 of those rights. In doing so, the court is guided by the Ninth  
20 Circuit's decision in Orthopaedic Hospital. In Orthopaedic  
21 Hospital, plaintiff challenged adjustments to reimbursement rates  
22 for several procedures and services. Orthopaedic Hosp., 103 F.3d  
23 at 1494. The court held that Section 30(A) requires the State  
24 "to consider the costs of providing. . . services" and that  
25 reimbursement rates "should bear a reasonable relationship to an  
26 efficient and economical [provider's] costs of providing quality

1 care." Id. at 1500. The court reviewed the State's rate setting  
2 under an arbitrary and capricious standard.<sup>18</sup>

3 The Orthopaedic Hospital rule is mostly procedural - the  
4 state agency must consider the proper factors in developing a  
5 reimbursement rate. Because costs were not considered by the  
6 State, the court did not reach the further question of whether  
7 the resulting rate was appropriate under Section 30(A).

8 The Ninth Circuit's approach has substantial practical  
9 benefits. The Medicaid Act is clearly intended to give states  
10 discretion and flexibility in setting reimbursement rates, within  
11 the limits of federal law. See Evergreen Presbyterian  
12 Ministries, 235 F.3d at 361 n.12; Children's Hosp. and Health  
13 Ctr. v. Belshe, 188 F.3d 1090, 1103 (9th Cir. 1999). The  
14 arbitrary and capricious standard limits the court's review of  
15 the State's rate setting and permits the court to defer to the  
16

---

17  
18 <sup>18</sup> The arbitrary and capricious standard is normally used  
19 to review federal administrative action under the Administrative  
20 Procedure Act, but that act does not address review of state  
21 actions. Dep't of Transp. & Dev. of La. v. Beaird-Poulan, Inc.,  
22 449 U.S. 971, 973, 101 S.Ct. 383 (1980) ("the APA is of course  
23 not applicable to state agencies"). However, most courts have  
24 used this standard to review state agency rate setting under  
25 Medicaid. See Ark. Med. Soc'y, Inc. v. Reynolds, 6 F.3d 519,  
26 529-30 (8th Cir. 1993) (reviewing compliance with Section 30(A)  
under arbitrary and capricious standard); Concourse Rehab. &  
Nursing Ctr. Inc. v. Whalen, 249 F.3d 136, 145 (2d Cir. 2001)  
(reviewing compliance with Boren Amendment under arbitrary and  
capricious standard); Lett v. Magnant, 965 F.2d 251, 257 (7th  
Cir. 1992) (Boren Amendment); AMISUB (PSL), Inc. v. Colo. Dep't  
of Soc. Servs., 879 F.2d 789, 799-800 (10th Cir. 1989) (Boren  
Amendment); see Wilder, 496 U.S. at 520 n.18 (noting that "the  
Courts of Appeals generally agree that . . . a federal court  
employs a deferential standard of review" in reviewing state  
Medicaid rate setting).

1 judgment of specialists in a complex regulatory field. Env'tl.  
2 Def. Ctr., Inc. v. U.S. EPA, 344 F.3d 832, 858 n.36 (9th Cir.  
3 2003). Furthermore, it is fair to assume that a rate that is set  
4 arbitrarily, without reference to the Section 30(A) requirements,  
5 is unlikely to meet the equal access and quality requirements.  
6 Thus, a beneficiary plaintiff may insist that the State, at a  
7 minimum, consider the effect of a rate reduction on equal access  
8 to quality services in light of provider costs.<sup>19</sup> Orthopaedic  
9 Hosp., 103 F.3d at 1500.

#### 10 V. Preliminary Injunction Standard

11 The traditional factors for granting a preliminary  
12 injunction are: (1) a strong likelihood of success on the merits;  
13 (2) irreparable injury; (3) a balance of hardships in the  
14 movant's favor; and (4) the public interest (in cases affecting  
15 it). See L.A. Mem'l Coliseum Comm'n v. Nat'l Football League,  
16 634 F.2d 1197, 1200 (9th Cir. 1980). The moving party can meet  
17 its burden by making "a clear showing of either (1) a combination  
18 of probable success on the merits and a possibility of  
19 irreparable injury, or (2) that its claims raise serious

---

21 <sup>19</sup> In general, the Director's approach to Orthopaedic  
22 Hospital in this litigation has been puzzling. The defendant has  
23 argued extensively in briefs and at argument that Orthopaedic was  
24 wrongly decided, even stating at one point that its "holding must  
25 be overturned." (Def.'s Supp. Brief at 2.) The defendant has  
26 attempted to convince the court that it simply cannot comply with  
Orthopaedic Hospital's requirement of conducting cost studies,  
declaring that "Orthopaedic is an example of the impractical and  
unreasonable requirement of relying upon cost studies as a basis  
for rate setting." (Opp'n to CMA's Mot. at 27.) If the  
defendant wishes to argue the impracticality or invalidity of  
Orthopaedic Hospital, she must do so before the Ninth Circuit.

1 questions as to the merits and that the balance of hardships tips  
2 in its favor." Conn. Gen. Life Ins. Co. v. New Images of Beverly  
3 Hills, 321 F.3d 878, 881 (9th Cir. 2003). "These two  
4 formulations represent two points on a sliding scale in which the  
5 required degree of irreparable harm increases as the probability  
6 of success decreases." Taylor By and Through Taylor v. Honig,  
7 910 F.2d 627, 631 (9th Cir. 1990).

8 A. Irreparable Injury

9 An irreparable injury is one that cannot be adequately  
10 redressed by a legal or equitable remedy following trial.  
11 Campbell Soup Co. v. ConAgra, Inc., 977 F.2d 86, 91 (3d Cir.  
12 1992). Plaintiffs come forward with adequate evidence that the  
13 rate reduction has a likelihood of reducing the recipient  
14 plaintiffs' access to medical services, including services by  
15 pharmacists.<sup>20</sup> (See supra note 5.) Medi-Cal recipients who must  
16 wait until after trial to receive appropriate services may well  
17 sustain irreparable injury, whether in pain suffered or  
18 irremediable worsening of a condition. A future permanent  
19 injunction after a full trial is not an adequate remedy for  
20 someone who has been denied necessary medical care in the  
21 interim.

---

22  
23  
24 <sup>20</sup> Both plaintiffs and defendant make evidentiary  
25 objections to each others' submissions. The objections either  
26 lack merit or do not affect the court's overall assessment of the  
record. See also Flynt Distrib. Co., Inc. v. Harvey, 734 F.2d  
1389, 1394 (9th Cir. 1984) (holding that court can consider  
inadmissible evidence in the context of a motion for preliminary  
injunction).

1 Defendant argues that there is too much uncertainty  
2 surrounding the impact of the 5% rate reduction to support  
3 plaintiffs' claim of irreparable injury. (Opp'n to CMA's Mot. at  
4 28.) But plaintiffs have produced evidence of serious access  
5 problems even under the current rates. (See, e.g., Anaya, Sr.  
6 Decl. ¶¶ 4-6; Anaya, Jr. Decl. ¶¶ 4-6; Geisse Decl. ¶¶ 5-6, 11;  
7 Low Decl. ¶¶ 7-8.) Plaintiffs have also produced evidence of  
8 providers who will stop taking new Medi-Cal patients or stop  
9 serving Medi-Cal patients altogether if the rate reduction is  
10 implemented. (See, e.g., Polansky Decl. ¶¶ 4-6; Germano Decl. ¶¶  
11 3-6; Geisse Decl. ¶ 11.) Given plaintiffs' high likelihood of  
12 success on the merits, discussed below, this evidence of  
13 irreparable injury is sufficient to support a preliminary  
14 injunction.

15 B. Likelihood of Success on the Merits

16 Section 30(A) requires the State to consider quality and  
17 access when setting Medi-Cal reimbursement rates. In order to  
18 properly consider quality and access, the State must consider  
19 what it costs providers to perform the various services and  
20 procedures. Orthopaedic Hosp., 103 F.3d at 1500.

21 The State's purpose in enacting the rate reduction was to  
22 reduce the budget deficit. The statute declares on its face that  
23 the rate reduction is "[d]ue to the significant state budget  
24 deficit projected for the 2003-04 fiscal year." Cal. Welf. &  
25 Inst. Code § 14105.19(a). While the State certainly is entitled  
26 to conserve funds, the defendant has produced no evidence that

1 the State legislature based the rate reduction on evidence that  
2 the reduction could be sustained by providers, in light of their  
3 costs, without a loss of quality or equal access for Medi-Cal  
4 recipients. Indeed, what little evidence there was before the  
5 State legislature suggested that a rate reduction might be  
6 inconsistent with quality and access. For example, the  
7 Legislative Analyst's report on the original proposed 15% rate  
8 reduction states that California's reimbursement rates, when  
9 adjusted for cost-of-living, are among the ten lowest in the  
10 country. (Campbell Decl. Ex. D, p. 16.) The report warns that a  
11 rate reduction could negatively affect access to services. (*Id.*,  
12 pp. 14-16.) Finally, the report declares that California has "no  
13 rational basis for [its] rate system" which can lead to  
14 "overpayments for some medical procedures and underpayments for  
15 others."<sup>21</sup> (*Id.*, p. 16.)

16 The defendant argues that the State legislature's initial  
17 rejection of the 15% rate cut shows that it did consider the  
18 relevant factors in enacting the lower cut. (Opp'n to CMA's Mot.  
19 at 22-24.) The defendant cites an Assembly subcommittee agenda  
20 that directed certain inquiries to the Department of Health

---

21  
22 <sup>21</sup> In 2001, the Legislative Analyst produced a report  
23 entitled A More Rational Approach to Setting Medi-Cal Physician  
24 Rates. Elizabeth Hill, A More Rational Approach to Setting Medi-  
25 Cal Physician Rates, available at  
26 [http://www.lao.ca.gov/2001/020101\\_medi-cal\\_rates.pdf](http://www.lao.ca.gov/2001/020101_medi-cal_rates.pdf). The report  
is critical of the Department of Health Services for not  
conducting regular, periodic rate reviews to ensure the  
consistency of rates with access to quality medical care. It  
also argues that the rate adjustments the Department has made  
over the years have not been based upon any assessment of  
recipients' access. *Id.* at 1-4.

1 Services. (Campbell Decl., Ex. C.) The agenda does show that  
2 the Assembly was concerned about "the impact of such a  
3 significant rate reduction on the availability of providers."  
4 (Id., p. 5.) However, there is no evidence of any response from  
5 the Department to the committee's inquiries that could now  
6 support a 5% cut.

7 In CIV-S-03-2110, which is focused solely on pharmacy  
8 services, the defendant argues that the State has met the  
9 Orthopaedic Hospital standard because the rates it pays are based  
10 on a pharmacy's acquisition costs. (Def.'s Suppl. Brief After  
11 Hearing at 5-6.) The evidence does show that reimbursement rates  
12 for prescription drugs are based upon a formula that includes the  
13 acquisition costs of drugs. (Hillbloom Decl. ¶¶ 5-8.) However,  
14 there is no evidence that the State legislature had any evidence  
15 about the consistency of the rate cut with access to quality  
16 pharmacy services.<sup>22</sup>

17 Under the standard of Orthopaedic Hospital, the plaintiffs  
18 demonstrate a high likelihood of success on the merits. There is  
19 no evidence that the State considered the relevant factors when  
20 it enacted the rate reduction. Budget constraints are not alone  
21 a valid justification for rate setting. See Ark. Med. Soc'y,  
22 Inc., 6 F.3d at 531 ("Abundant persuasive precedent supports the  
23

---

24 <sup>22</sup> The defendant has produced some evidence to show that  
25 pharmacies' costs will continue to be met after the 5% rate  
26 reduction. (Def.'s Suppl. Brief at 6-7.) If so, the record  
suggest that this outcome is by luck, not design. Nonetheless,  
there is no evidence that the State considered the possible  
effect on beneficiaries' access to pharmacist services.

1 proposition that budgetary considerations cannot be the  
2 conclusive factor in decisions regarding Medicaid."); Orthopaedic  
3 Hosp., 103 F.3d at 1499 n.3; AMISUB, 879 F.2d at 800-01.

4 C. Public Interest and the Balance of Hardships

5 In deciding to grant an injunction, a court must consider  
6 the balance of hardships and, in a case such as this, the public  
7 interest. The defendant argues that the court should refrain  
8 from issuing a preliminary injunction because of the State's  
9 "unprecedented budget deficit." (Opp'n to CMA's Mot. at 43.)

10 The defendant maintains that the State was faced with very  
11 difficult choices and made the best decision that it could.  
12 (Id.) For example, the defendant points out that instead of  
13 reducing rates across the board, "the state could have chosen to  
14 eliminate certain optional benefits such as prescription drugs  
15 for adults," but that this would be a harsh result (Id.)

16 The court is mindful of the difficult position facing  
17 California. However, the terms of the State's participation in  
18 Medicaid do not permit it to continue to receive federal monies  
19 while violating the requirements of the statute, even for a good  
20 purpose, such as maintaining optional benefits. As long as the  
21 State wishes to be a part of the Medicaid program, it must meet  
22 the requirements of the Medicaid Act.

23 The court also notes that this injunction does not leave the  
24 State without options for reducing its Medicaid expenditures.  
25 First, after proper study and consideration of the relevant  
26 factors, the defendant may be able to show that a reduced

1 reimbursement rate in some medical services is not arbitrary but  
2 in fact is consistent with quality care and equal access.  
3 Second, there are other ways the State can save money within the  
4 Medi-Cal program. The Legislative Analyst has recommended  
5 several alternatives to an across-the-board rate reduction  
6 including expanding the medical case management program,  
7 increasing copayments for non-essential services, increasing  
8 competition for the State's managed care contracts, and expanding  
9 managed care enrollment among the elderly and disabled.  
10 (Campbell Decl. Ex. D, pp. 18, 20, 24, 25.) The State also  
11 chooses to provide Medi-Cal recipients with a number of services  
12 not required by federal law. An earlier proposal called for  
13 eliminating 18 of the 34 offered optional benefits, which would  
14 have saved the State approximately \$360 million. (Id. Ex. C, p.  
15 6.) While all of these "optional" services are obviously  
16 important to the recipients, the State does have the authority to  
17 drop optional services to reduce costs. What the State cannot do  
18 under the statutory terms of its participation in Medicaid is to  
19 elect to provide a service but then fail to fund it such that  
20 Medi-Cal recipients receive less than equal access to quality  
21 care for that service.

22       Given that the State has other options available to it and  
23 that plaintiffs are likely to succeed on the merits of their  
24 claim, the court finds that the public interest does not weigh  
25 against issuance of a preliminary injunction.  
26

1 VI. Conclusion

2 Because the State failed to consider the effect of a rate  
3 reduction on beneficiaries' equal access to quality medical  
4 services, in view of provider costs, the pending rate reduction  
5 is arbitrary and cannot stand. Defendant Bonta is enjoined from  
6 implementing the 5% reimbursement rate reduction required by  
7 Welfare and Institutions Code § 14105.19 pending further  
8 proceedings in this court. This injunction does not apply to §  
9 14105.19(b)(3), which reduces capitation rates paid to managed  
10 care plans by the actuarial equivalent of 5%. The injunction  
11 also does not apply to § 14105.19(b)(2), which reduces payments  
12 made in certain non-Medi-Cal programs.

13 The Department of Health Services is dismissed from CIV-S-  
14 03-2110 on the basis of 11th Amendment immunity.

15 IT IS SO ORDERED.
